

## SU ESPECIFICACIÓN REQUERIDA

HT 20 TEC - HT 20 TEC

### TELESCOPIC hookloader with sliding arm

- Loading / unloading / tipping
- Transfer to trailer
- Transport height: 240 mm
- Lifting capacity: 20 t
- Hydraulic supply by pump (pump not included)

### STANDARD TEC

- V Drive control
- SDS180 main valve
- Soft stop
- CANBUS Truck communication
- Connected

### STRUCTURE

- Welded high strength steel construction
- Z-shaped subframe with bolted mounting holes
- Offset between pulley and tipper axes to reduce horizontal forces and increase tipping capacity
- Use of moulded parts in high duty areas: hook, pulley, tipper, arm bracket and main cylinder bearings to improve service life
- Rubber socket to reduce play and noise
- Container supports bolted
- Main valve with tailor-made design plastic molded cover for optimal protection

### SAFETY

- Electrical and hydraulic safety devices in accordance with CE standards
- Pressure relief valve on the main control valve to prevent overloading
- Load holding valve or pilot valve on all cylinders
- Monitoring and protection of the arm by electronic sensors
- Mechanical locking of the tipping frame during unloading and transfer to trailer
